

The Finance Solution

Finance • Accounting • Ledgers

With competition and economic climate pressures ever increasing, the requirements of the company accounting function have moved beyond accounts receivable, payable and general ledgers. Now the 'finance' function can provide real time information, reporting and analysis to enable businesses to react quickly to changing factors.

Overview

Whether your business manufactures products, provides services, distributes goods – or a combination of any or all of these operations, without question your business requires robust financial control and reporting. The finance solution of **sage ERP X3** provides this and more – fully integrated with ALL the operational control your business needs.

sage ERP X3 • Multi Company

Multi-site and multi-company operations are handled with ease within the same database allowing for flexible consolidation and reporting. Differing fiscal legislation between countries is accommodated without compromising the overall structure of a true corporate setup.

sage ERP X3 • Multi Currency

Buy in Dollars, sell in Euro's, report in Sterling and produce consolidated accounts in Yen? **Sage ERP X3** does not constrict any transaction to a particular currency with full reporting, exchange rate control and full Intrastat reporting.

sage ERP X3 • Full Audit Trail and Logging

Full traceability of all transactions from source entry down to journal level is embedded throughout the entire system. This provides not just a log but an auditable trail of all changes: user, date and time stamped.

sage ERP X3 • Budgeting and Forecasting

Keeping a close eye on the budget is one thing – with real time analysis against actuals, **Sage ERP X3** provides exceptional financial management control for your budgets. Budgets are fully integrated into Supply Chain processes, enabling full procurement monitoring against Budget. Multiple budgets and forecasts can be managed.

sage ERP X3 is an affordable, modern software solution specifically for your type of business.

"We have requests for information from our corporate customers in respect of their consignment stock on virtually a daily basis and every one is different. Sage ERP X3 will give us the right level of information, available on-demand and with Inixion's Sage ERP X3 reporting expertise we look forward to being able to provide our partners with the information, in the format required yet still be able to drill into that information and analyse further"

Stuart Bettington
Finance Director TXO Systems

sage ERP X3 • The Complete Business Management System

Great financial control alone won't run your business. Sage ERP X3 provides robust functionality for every department – backed with extensive and flexible reporting options.

Stock control: for production, manufacture or assembly or distribution; inventory management with multiple location & bin control, batch and serial number control and warehouse management.

Sales: sales order management, project/contract management, credit control, invoicing & cash collection.

Purchasing: RFQ's, blanket/contract order management, supplier rating & classification, security & workflow, commitments against budget, payment management & sub-contracting.

Customer relationship management (CRM): marketing, campaign management, sales force automation, customer support, knowledge base.

Workflow: streamlining business operations & information flow of information. Send information, route documents and make decisions both within the business and your business partners.

Business Intelligence: define unique performance metrics, triggering events, rules & conditions - control realtime business intelligence as needs dictate.

sage ERP X3 • Automate & Adapt

Designed to help businesses increase agility, responsiveness and productivity, **Sage ERP X3** is characterised by its ability to automate any type of process and adapt quickly to all kinds of situations.

Adapts as your company evolves. Sage ERP X3 is key to improving enterprise flexibility: modular and flexible structure can be adapted to suit all kinds of organisations.

Facilitating change management: reorganising a system changes routines and the information system is often at the heart of these changes. With configurable *Sage Visual Processes*, **Sage ERP X3** makes it easy to implement new procedures for each role within the company.

"Inixion took control of all the IT and Telephony aspects of the project from inception, and delivered the project with a methodical and detailed approach. As the business commenced operations on the Monday morning, I walked around the offices waiting for 'something to go wrong', but it never did. Inixion had all angles covered.

Furthermore, tight budgetary control was in place, and the final project was indeed delivered on budget"

Mark Stanworth
Group CFO Mayborn Group PLC

A dedicated team of specialists with many years of experience of implementing solutions

Our philosophy at Inixion is that 'go-live' is not the end – but the beginning – the beginning of a working partnership with your company to ensure that your system continues to not just function but to add to your company by providing structure and focus for the processes you have in place today and those that are to follow as your company evolves in an ever changing market.

"The consolidation of the three computer systems at Spotless Punch was a critical part of our strategy, and it was essential that it happened with minimal impact on our Customers and Suppliers. The team at Inixion managed the entire project and delivered everything with a methodical and detailed approach"

Jason Keeley,
Chief Financial Officer Spotless Punch
