

The Manufacturing Solution

Manufacturing • Assembly • Production

Whether your company produces from raw-state materials, assembles pre-manufactured modules or just repacks/relabels goods, you have very specific requirements from a system and need that functionality to be at the core of the solution.

You may need all or some of the following:

- Make-to-stock
- Make to order or project
- Manufacture by “Batch or process”
- “Discrete” manufacturing
- Technical data setup
- Replenishment & planning rules
- MPS, MRP schedule
- Workplan and manufacturing analysis
- Interactive capacity planning
- Variety of material tracking methods
- Cost accounting

Of course there are many other aspects of business that are required in addition to the above – but your business revolves around production and that's exactly what **Sage ERP X3** was designed to do – along with ALL the other things your business needs.

• Production Planning

The planning functions are equipped with net requirements calculations, a manufacturing management program and a scheduling function to create a fully optimised manufacturing process to deliver exceptional performance and reduce lead times to customers.

• Production Traceability and Control

Full traceability and in-depth quality control management are embedded throughout all purchase, customer and production transactions, including comprehensive subcontracting management: outsource one or more operations, project tracking functions tracking all transactions with full visibility and traceability of all costs and project progress.

• Control Production Costs

To keep product, project and structure costs under control, **Sage ERP X3** includes a powerful industrial analytical accounting function to provide manufacturers with an exceptional management control tool.

Sage ERP X3 enables you to easily and efficiently manage key business functions – **sales, production, stock, purchasing and financials**, all from a **single business system** and controlled with **embedded workflow**.

 is an affordable, modern software solution specifically for your type of business.

"We have requests for information from our corporate customers in respect of their consignment stock on virtually a daily basis and every one is different. Sage ERP X3 will give us the right level of information, available on-demand and with Inixion's Sage ERP X3 reporting expertise we look forward to being able to provide our partners with the information, in the format required yet still be able to drill into that information and analyse further"

Stuart Bettington
Finance Director TXO Systems

sage ERP X3 • The Complete Business Management System

Great production control alone won't run your business. Sage ERP X3 provides robust functionality for every department – backed with extensive and flexible reporting options.

Finance: multi-company, multi-site, multi-currency, compliance to multiple fiscal legislations and accounting practices. User defined fiscal calendars, flexible analytics, budgeting & forecasting, complete audit logs & trail, fixed assets.

Service: contract & guarantee management, call logging, schedules, returns management including RMA's

Purchasing: RFQ's, blanket/contract order management, supplier rating & classification, security & workflow, commitments against budget, payment management & sub-contracting.

Customer relationship management (CRM): marketing, campaign management, sales force automation, customer support, knowledge base.

Workflow: streamlining business operations & information flow of information. Send information, route documents and make decisions both within the business and your business partners.

Business Intelligence: define unique performance metrics, triggering events, rules & conditions - control realtime business intelligence as needs dictate.

sage ERP X3 • Automate & Adapt

Designed to help businesses increase agility, responsiveness and productivity, **Sage ERP X3** is characterised by its ability to automate any type of process and adapt quickly to all kinds of situations.

Adapts as your company evolves. Sage ERP X3 is key to improving enterprise flexibility: modular and flexible structure can be adapted to suit all kinds of organisations.

Facilitating change management: reorganising a system changes routines and the information system is often at the heart of these changes. With configurable *Sage Visual Processes*, **Sage ERP X3** makes it easy to implement new procedures for each role within the company.

"Inixion took control of all the IT and Telephony aspects of the project from inception, and delivered the project with a methodical and detailed approach. As the business commenced operations on the Monday morning, I walked around the offices waiting for 'something to go wrong', but it never did. Inixion had all angles covered.

Furthermore, tight budgetary control was in place, and the final project was indeed delivered on budget"

Mark Stanworth
Group CFO Mayborn Group PLC

A dedicated team of specialists with many years of experience of implementing solutions

Our philosophy at Inixion is that 'go-live' is not the end – but the beginning – the beginning of a working partnership with your company to ensure that your system continues to not just function but to add to your company by providing structure and focus for the processes you have in place today and those that are to follow as your company evolves in an ever changing market.

inixion

provides a complete end-to-end solution for your business

- Hardware
- Professional Services
- Business intelligence consultancy
- Support, fully backed by Sage

"The consolidation of the three computer systems at Spotless Punch was a critical part of our strategy, and it was essential that it happened with minimal impact on our Customers and Suppliers. The team at Inixion managed the entire project and delivered everything with a methodical and detailed approach"

Jason Keeley,
Chief Financial Officer Spotless Punch
